Skills

- Javascript | Python | React.js | Next.js | Node.js | Express.js | Tanstack | Material UI | TailwindCSS |
- Scikit learn | Tensorflow | Keras | LLMs | Pandas | Numpy | Git/Github | MongoDB | SQL

Professional Experience

Full Stack Developer   **TapitCard**   NSTP Islamabad, Pakistan Feb 2023 – Oct 2023

- Responsible for creating a full-stack web application to automate the business's affiliate program which resulted in faster onboarding of affiliates and easier tracking of the company's expenses.
- Communicated with stakeholders regarding requirements elicitation, analysis, and planning.
- Produced detailed requirement documents, including use cases, user stories, and system specifications to facilitate development processes.
- Designed and developed both the front-end and APIs, ensuring smooth integration within the application

Projects

Neutra News (FYP)

An AI-powered news aggregation platform that gathers news from multiple sources, provides analytics, clusters similar articles into stories and detects media bias.

Technology Stack**:** Google Gemini, Apache Airflow, SBERT, Unsupervised learning , Next.js, NextAuth , Tanstack, MongoDB

Transformatics   https://transformatics.pk

A paid project by Transformatics for registering different courses and making payments using JazzCash.

Technology Stack: React, Tailwind CSS, Node.js, Express.js, JazzCash API, Google Sheets Apps script

PriceWice   https://github.com/Abdul-Wahab-318/price-wice

Get an email update whenever a product's price changes. Just enter the product's url and wait for the price to drop

Technology Stack**:** Next.js, Cheerio.js, MongoDB

KFC Clone   https://github.com/Abdul-Wahab-318/react-kfc

A complete clone of KFC allowing users to browse items, place and track their orders. Admin dashboard allows admins to perform CRUD operations on items and orders.

Technology Stack: React.js, Redux, Node.js, Express.js, Cloudinary API, JWT, MongoDB, Mongoose

Achievements

- Winner of AirTech '24 Webathon
- Winner of WebAir '24
- Winner of CodeAir 2.0 (2023)

Education

Air University, Islamabad - Bachelor of Science in Software Engineering   Sept 2021 - June 2025 (Expected)
GPA: 3.46/4

Courses and Specializations

- **Machine Learning Specialization (Deeplearning.ai)**
- **Deep Learning Specialization (Deeplearning.ai)**
